Summary

Full-stack SDE with 3 internships (React, Node.js, Python) and production-shipped products serving 1,000+ daily AI queries at 90% accuracy. Reduced API latency 35%, cut UI bugs 25%, and accelerated operational workflows by 15%. Adept at building RESTful APIs, scalable backend systems, and responsive UIs. Seeking a backend or full-stack SDE role to engineer high-reliability, production-grade systems.

Experience

Software Development Engineer Intern

Bluestock Fintech, Remote

Jul 2025 – Aug 2025

- Rebuilt 3 React.js dashboard modules (replacing legacy jQuery) for 20+ daily ops staff; reduced average task-completion time by 15% and eliminated 2 recurring manual workflows, improving team throughput.
- Authored Jest unit tests for 12 critical API endpoints, raising test coverage from ~30% to 75% and reducing production bug recurrence by 20% over 6 weeks; integrated tests into CI/CD pipeline for automated regression checks.
- Collaborated with backend engineers to optimise REST API response contracts, reducing frontend data-fetching overhead and improving dashboard load performance.

Web Development Intern

International Data Solution, Remote

Feb 2025 – Jun 2025

- Delivered 3 production React.js + Tailwind CSS web apps across e-commerce and healthcare verticals, achieving full cross-browser compatibility and on-time sprint delivery for external clients.
- Integrated 8+ third-party REST APIs (payment, auth, data feeds) into responsive UIs; reduced client-reported UI bugs by 25% vs. prior benchmarks through systematic Postman-based validation and error-boundary handling.
- Implemented reusable component libraries and standardised code review practices, cutting onboarding time for new developers on client projects.

AI/ML Development Intern

Next24Tech, Remote

Jun 2024 – Aug 2024

- Built and benchmarked 4 classifiers (Random Forest, XGBoost, SVM, LSTM) on financial fraud datasets, achieving 85% test accuracy — 12 percentage points above the logistic regression baseline.
- Automated Pandas and Scikit-learn preprocessing pipelines for 5 datasets (50K–200K rows each), cutting per-dataset manual effort by 30% and enabling same-day model iteration cycles.
- Performed hyperparameter tuning via grid search and cross-validation, improving model generalisation and reducing overfitting across all four classifiers.

Projects

Face Sync-AI Wellness Mirror · Python · OpenCV · DeepFace · Librosa · Node.js · React

[Live](#)

- Built dual-channel real-time emotion detection using facial expressions (OpenCV + DeepFace) and vocal tone (Librosa + MFCC), improving wellness assessment accuracy by ~18% over single-modality baselines.
- Designed a REST API backend in Node.js to serve model inference results to the React frontend with sub-second latency.

Yojana Dost · React.js · Node.js · Supabase · OpenAI GPT-4o

[Live](#) [Github](#)

- Full-stack platform aggregating 150+ Indian government schemes; GPT-4o-powered AI chatbot handles 1,000+ daily queries at 90% accuracy, beta-tested with 50+ users across diverse literacy levels.
- Optimised Supabase PostgreSQL queries and implemented server-side caching, cutting average API response time by 35% to under 800 ms; deployed on Vercel with CI/CD for zero-downtime releases.

Insightful Habits · React.js · Node.js · Express.js · Chart.js · Supabase

[Github](#)

- Habit-tracking web app with a Node.js/Express REST API backend; analyses 100+ daily entries and visualises trends via Chart.js dashboards — 15 beta users reported 40% improvement in habit awareness.

Reflect & Thrive · React.js · Node.js · Supabase · OpenAI

[Github](#)

- Journaling platform with AI-powered session summaries (OpenAI API), daily streaks, and 90-day mood-trend analysis; leverages Supabase Row-Level Security for per-user data isolation and privacy.

Technical Skills

Languages	JavaScript, TypeScript, Python, Java, C++, PHP
Frameworks	React.js, Node.js, Express.js, Tailwind CSS
Databases	PostgreSQL, SQL, MongoDB, Supabase
Cloud & DevOps	AWS (EC2, S3), Azure AI Cognitive Services, Docker, CI/CD, Git
Testing & Tools	Jest, Postman, REST APIs, Cross-browser Testing
Concepts	Full-Stack Development, System Design, Machine Learning, DSA, DBMS, Agile/Scrum

Education

B.Tech. Computer Engineering — Baba Ghulam Shah Badshah University, Poonch, J&K

Aug 2022 – May 2026

CGPA: 7.5/10 | Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Computer Networks, Operating Systems

Certifications

Azure AI & Cloud — IBM Training Program

Mar 2026
